

# THE GLASS REVOLUTION

Designing with Architectural Decorative Glass is the new way forward for interior built solutions.

*"Perfect solution for providing views or privacy, opening up any space, encourages flow of natural light to come within, to create a sense of openness and merge well with the surroundings"*

*"Decorative glass is the perfect solution for providing privacy, opening up any space to encourage flow of natural light to come within and to create a sense of openness while merging well with the surroundings"*

CT Tan, Managing Director

Today, thanks to advance technology, glass offers various performance driven glass as well as many decorative styles treatment on glass for today's interior built. Thus, architects and designers now have more design versatility options to create an inviting environment.

## Did you know that decorative glass can dramatically change the feel of a given space?

Decorative glass offers custom creation of unique one-of-a-kind design for both interior and exterior glazing applications. The broadest range of decorative glass products is available for the widest array of applications possible. Size of glass is not an obstacle and can meet virtually with any design theme. Safety and impact resistance performance glass such as laminated glass, tempered glass and thick monolithic glass are predominantly used. Decorative treatments such as silk screen, digital print images, colors, patterns, laminate, sandblast, 3D etch, texture, kiln formed, ceramic frit, leaded art, stained art glass, antique mirror can all be produced onto glass with various levels of translucency and light transmission
